

Comhairle Contae Mhaigh Eo
Mayo County Council

Have you a domestic heating Oil Storage Tank?

Oil leaks can cause damage to your property and can lead to serious environmental pollution.

Oil storage tanks will degrade over the years and will need replacing. Before you get oil delivered this winter make sure to check for any signs of wear and tear and protect your tank from damage.

WATCH OUT FOR

- ✓ Cracks and discoloration on tank
- ✓ Tanks overgrown with foliage or in danger of falling trees
- ✓ Sudden drop in oil level of your tank
- ✓ Smell of oil around your tank or garden
- ✓ Pipes that may be in danger of damage from ground works
- ✓ Rust on pipework, valves or gauges
